ACRA Electric Inc. has provided Electrical Contracting Services in Southwest Florida since 1975. Their other Divisions include Residential, Commercial, Service, and Generator Sales and Installation.

Florida State Electrical Unlimited
License # EC0000346

ACRA's Marine Division specializes in Boat Lift Wiring, Dock Lighting, and Marina Electrical Systems.

Boat Lift Installers and Manufacturers, as well as Marina Designers and Operators, recommend **ACRA Electric Inc.**, due to our experience and quality workmanship.

ACRA ELECTRIC INC.

What makes **ACRA** the **BEST** and **SAFEST**...

All jobs receive *Electrical Permits and Inspections* from the appropriate authorities.

We offer *Marine Pedestals with a choice of outlets for any requirement, lighting systems for docks that will last, and remote controls for boat lifts that will add safety and convenience.*

1. Detailed drawings are produced for every job detailing scope of work.

ACRA works with our customers to design a complete system on paper before we begin work.

2. Conduit is never installed under water to outboard lift motors if there is a connection to dock. All boat lift motors are rewired for 240 volts for more efficient operation.
3. All lift motor wiring is GFCI protected, exceeding National Electrical Code Requirements.
4. Lift controls are hard wired in fiberglass enclosure.
5. Wireless controls by **GEM Remotes** with optional autostop limit switch available.
6. All docks are wired using Schedule 80 Heavy-Wall PVC installed neatly and securely, stainless steel fasteners, and copper wiring.
7. All ACRA employees undergo training for installation and safety.
